

Scarf Styling Made Easy

How to wear your scarves in creative and elegant ways.

THERE IS NOTHING LIKE A SCARF!

...ESPECIALLY A SILK SCARF.

*S*ilk Scarves are the best accessories – they feel great against your skin, they add a finishing touch to any outfit, they keep you warm, they are lightweight and easy to take with you anywhere. They are silken jewelry and the perfect portable accessory.

Several years ago at a Gala in Paris, I remember looking around the room to see what it was about the women there that looked so chic. Almost every one was wearing a scarf or a shawl – tied in a bow, held together with a brooch, wrapped around their shoulders...every imaginable way. They looked elegant and fashionable.

Scarves are fun with casual clothes, they add a feminine touch to a business suit and can enhance a simple dress.

One of my favorite ways to wear scarves is to have two of the same scarf – one on and one in my pocket. Then when it gets chilly, out comes the extra scarf as a kerchief and it is an extension of the scarf around my neck. A very glamorous look!

As you will see in this book, scarves are not only for your neck and shoulders. You can wear them as belts, blouses, headbands, ponytail ties and cell phone holders. You can frame them to decorate your home. Be creative– you'll find even more ways to enjoy your scarves.

We hope that these scarf styling tips will help you to enjoy your scarf wardrobe even more.

Sincerely,

Angela Joy Coppola
